

RAČUNAJMO S RAZLOMCIMA

1. Poveži jednake brojeve ili ispiši brojeve jednakih vrijednosti (dva broja nemaju para)

$2\frac{1}{7}$	$\frac{3}{4}$	$1\frac{1}{5}$	0.7	$\frac{18}{20}$		
$\frac{8}{9}$	0.9	$\frac{18}{15}$	$\frac{1}{10}$	$\frac{15}{7}$	0.75	$\frac{7}{10}$

2. Zaokruži dvije točne jednakosti:

a) $1.07 = \frac{107}{100}$ b) $2\frac{3}{100} = \frac{23}{100}$ c) $4\frac{27}{1000} = \frac{4027}{1000}$ d) $\frac{105}{10\ 000} = 0.0105$

3. Skrati do kraja razlomke $\frac{24}{42}$ i $\frac{180}{210}$.

4. Dopuni oblačiće:

5. Množi redom s $1\frac{1}{2}$ te umnožak upiši u sljedeći prazan oval.

6. Dopuni:

Je li konačan rezultat prirodan broj?
